## A. Sample Citation and Introduction to Citing Journal Articles

The general format for a reference to a journal article, including punctuation:

[Examples of Citations to Journal Articles](#)

By tradition, the rules for formatting references to journal articles permit greater abbreviation compared to books:

- Journal references omit information on place of publication and publisher, whereas book references carry these details.
- The words "volume" and "number" (or their abbreviations) are usually omitted when citing journal articles, but are included when citing books.
- Journal titles are abbreviated; book titles are not.

This brevity in citing journal articles stems from the need to conserve space in printed bibliographies and the early databases.

Following are some important points concerning citing journal articles:

- Cite the journal name that was used at the time of publication. For example, the British Medical Journal officially changed title to BMJ in 1988. Cite articles from 1987 and earlier as Br Med J, not BMJ.
- Cite the version you saw. For example, do not cite the print version if you have used the Internet one.
- Do not include a header, such as "news", "case report", or "clinical study", as part of the article title, unless the table of contents for the journal issue indicates that it is.
- Use caution when employing typography, such as bold type and italics, to indicate parts of a journal article citation. Too many variations in type styles may actually make the reference harder to read.

The source for journal title, volume, issue, and date information is, in order of preference: (1) the title page of the issue, (2) the issue cover, and (3) the masthead. Running headers or footers may not carry the official title of a journal and date and issue information may be missing from these locations.

## Citation Rules with Examples for Journal Articles

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

[Author \(R\)](#) | [Author Affiliation \(O\)](#) | [Article Title \(R\)](#) | [Article Type \(O\)](#) | [Journal Title \(R\)](#) | [Edition \(R\)](#) | [Type of Medium \(R\)](#) | [Date of Publication \(R\)](#) | [Supplement/Part/Special Number to a Date \(R\)](#) | [Volume Number \(R\)](#) | [Supplement/Part/Special Number to a Volume \(R\)](#) | [Issue Number \(R\)](#) | [Supplement/Part/Special Number to an Issue \(R\)](#) | [Location \(Pagination\) \(R\)](#) | [Physical Description \(O\)](#) | [Language \(R\)](#) | [Notes \(O\)](#)

### Author for Journal Articles (required)

#### *General Rules for Author*

- List names in the order they appear in the text
- Enter surname (family or last name) first for each author
- Capitalize surnames and enter spaces within surnames as they appear in the document cited on the assumption that the author approved the form used. For example: Van Der Horn *or* van der Horn; De Wolf *or* de Wolf *or* DeWolf.

- Convert given (first) names and middle names to initials, for a maximum of two initials following each surname
- Give all authors, regardless of the number
- Separate author names from each other by a comma and a space
- End author information with a period

See exceptions for Author in Appendix F: Notes for Citing MEDLINE® /PubMed®.

#### *Specific Rules for Author*

- Other surname rules
- Given names containing punctuation, a prefix, a preposition, or particle
- Degrees, titles, and honors before or after a personal name

- Names appearing in non-roman alphabets (Cyrillic, Greek, Arabic, Hebrew) or character-based languages (Chinese, Japanese, Korean)

- Keep compound surnames even if no hyphen appears

Jaime Mier y Teran *becomes* Mier y Teran J

Virginie Halley des Fontaines *becomes* Halley des Fontaines V

[If you cannot determine from the article whether a surname is a compound one or a combination of a middle name and a surname, look to the table of contents of the issue or an annual or other index for clarification. For example, Elizabeth Scott Parker may be interpreted to be Parker ES or Scott Parker E.]

- Ignore diacritics, accents, and special characters in names. This rule ignores some conventions used in non-English languages to simplify rules for English-language publications.

#### Translated article titles ending in punctuation other than a period

- Most article titles end in a period. When a translation of an article title is provided, place it in square brackets, with a closing period outside the right bracket.

- If a title contains a Greek letter or some other symbol that cannot be reproduced with the type fonts available, substitute the name for the symbol. For example,  $\Omega$  becomes omega.

Jagetia GC, Baliga MS, Venkatesh P. Influence of seed extract of *Syzygium Cumini* (Jamun) on mice exposed to different doses of  $\gamma$ -radiation. *J Radiat Res (Tokyo).* 2005 Mar;46(1):59-65.

**Box 18****Article titles with headers**

- Journal articles sometimes contain a header (such as news, case report, or clinical study) at the top of the page to indicate a section of the issue. Do not include a header as part of the article title unless the table of contents for the journal issue indicates that it is.

**Box 19****No article title can be found**

- Occasionally an article does not appear to have any title; the article simply begins with the text. In this circumstance, create a title from the first few words of the text

and place it in square brackets. Use enough words to make the constructed title meaningful.

### *Examples for Article Title*

18. Journal article in a language other than English
19. Journal article in a language other than English with optional original language title included

23. Journal article title with special characters

### **Article Type for Journal Articles (optional)**

#### *General Rules for Article Type*

- Some bibliographies and online databases show a place of publication after a journal title, such as Clin Toxicol (Phila). This practice is used to show that two or more journal titles with the same name reside in a library collection or database; the name of the city where the journal is published distinguishes the titles. The city is usually shown in abbreviated format following the same rules used for words in journal titles, as Phila for Philadelphia in the example above. If you use a bibliography or database such as PubMed to verify your reference and a place name is included, you may keep it if you wish.

It is not NLM practice, but an issue number may be omitted if the journal is continuously paginated throughout the volume. However, note that many libraries such as the NLM require issue numbers for retrieval from their collections and for interlibrary loan.

#### **Location (Pagination) for Journal Articles (required)**

##### *General Rules for Location (Pagination)*

- Give the inclusive page numbers on which the article appears
- Do not repeat page numbers unless they are followed by a letter. For example: 123-125 becomes 123-5, but 124A-126A is correct.
- Include a letter (often S for Supplement or A for Appendix) when it precedes the page number. For example: S10-8.
- End pagination information with a period

##### *Specific Rules for Location (Pagination)*

- Roman numerals used as page numbers

- Discontinuous page numbers
- Text such as a discussion, quiz, or author reply to a letter follows the article
- No numbers appear on the pages of the article

**Box 52****Roman numerals used as page numbers**

- Unlike the practice with volume and issue numbers, keep roman numerals expressing location (pagination)
- Use upper or lower case, whichever appears in the publication

*Examples:*

Nagpal S. An orphan meets family members in skin. *J Invest Dermatol*. 2003;120(2):viii-x.

Gothefors L. [Current aspects in vaccination program for children]. *Vardfacket*. 1991;15(16):X-XI. Swedish.

**Box 53****Discontinuous page numbers**

- If the pagination is discontinuous, as often occurs when an article is interrupted by advertisements, separate the groupings of page numbers by a comma and a space  
:345-6, 348-9, 352.  
:15, 17, 19-21.
- Give up to three groupings of page numbers and use "passim" in place of the fourth and later occurrences  
:345-346, 348-349, 352, 355-357, 360, 362. *becomes* :345-6, 348-9, 352 passim.

**Box 54****Text such as a discussion, quiz, or author reply to a letter follows the article**

- Begin with the location (pagination) of the article
- Follow it by a semicolon and a space
- Add the name of the additional material and its location (pagination)
- End with a period  
:145-54; discussion 155-6.  
:23-35; quiz 36-42.  
:458-9; author reply 460.

**Box 55****No numbers appear on the pages of the article**

Occasionally, a journal article will have no page numbers.

- If only the particular item to be cited has no page numbers, identify the location in relation to numbered pages. For example: preceding p. 1 or following p. 503. Place such phrases in square brackets.

Kolloch RE. [In practice nothing has changed in the indication for therapeutic use of calcium antagonists]. Fortschr Med. 1997;115(33):[preceding p. 55]. German.

[New nifedipine preparation makes single daily dose possible]. Fortschr Med. 1997;115(33):[following p. 54]. German.

- If the entire publication has no page numbers, give the total number of pages of the item you wish to cite, placed in square brackets, such as [5 p.].

### Examples for Location (Pagination)

59. Journal article with page numbers including a letter
60. Journal article with roman numerals for page numbers (upper or lower case as found)
61. Journal article with discontinuous pagination
62. Article on an insert, pages tipped in the issue
63. Journal article with indication that additional text follows it
64. Journal article with no page number provided

### Physical Description for Journal Articles (optional)

#### General Rules for Physical Description

- Give information on the location of an article and its physical characteristics when the journal appears in a microform (microfilm, microfiche, etc.). For example: microfiche 2 of 3 microfiche: color, 2 x 4 in.

See exceptions for Physical Description in Appendix F: Notes for Citing MEDLINE® / PubMed®

#### Specific Rules for Physical Description

- Language for describing physical characteristics

#### Box 56

##### Language for describing physical characteristics

- If a journal volume or issue is published on microfiche or microcards, follow the pagination with information on the location of the article within the fiche or cards. For example, if the volume or issue consists of 5 microfiche and the particular article being cited is on the third fiche, cite it as "microfiche 3 of 5 microfiche." Enter a colon and a space, then enter information on the physical characteristics, such as color and size. Separate types of information by commas.

*Typical words used include:*

color  
black & white  
positive

negative

4 x 6 in. (standard microfiche size)

3 x 5 in. (standard microcard size)

*Examples of complete physical description statements:*

microfiche 1 of 3 microfiche: color, positive, 4 x 6 in.

microcard 4 of 5 microcards: black & white, 3 x 5 in.

- If a journal volume or issue is published on microfilm, follow the pagination with information on the film and its physical characteristics, such as color and size. Because microfilm reels carry a large amount of text, a volume is usually contained within one reel.

*Typical words used include:*

color

black & white

positive

negative

35 mm.

16 mm.

*Examples of complete physical description statements:*

1 reel: color, positive, 35 mm.

2 reels: black & white, negative, 16 mm.

See exceptions for Language in Appendix F: Notes for Citing MEDLINE® /PubMed®

### *Specific Rules for Language*

- Articles appearing in more than one language

#### **Box 57**

  - Give the English language version of the article title
  - List all languages of publication, separated by commas, after the location (pagination)
  - Capitalize the language names

- If an article is written in more than one language and none of them is English:

- As an option, when an article title is written in two or more equal languages as often occurs in Canadian publications:
  - Give all titles in the order in which they are presented in the text
  - Separate them with an equals sign surrounded by a space
  - List all the languages, separated by commas, after the location (pagination)
  - Capitalize the language names
  - End the list of languages with a period

**Notes for Journal Articles (optional)***General Rules for Notes*

- Notes is a collective term for further information given after the citation itself
- Complete sentences are not required

- Be brief

### *Specific Rules for Notes*

- Errata
- Retractions
- Electronic publication before print
- Article accompanied by a videocassette, CD-ROM, DVD, etc.
- Other types of material to include in notes

#### **Box 58**

##### **Errata**

Errata (error notices) range from simple indications of a misspelling to serious errors in drug dosages or mathematical calculations. NLM uses two ways to show errata in a citation:

1. a note indicating that the article being cited had a subsequent erratum notice published
2. a note indicating that the article being cited contains an erratum notice

NLM policy is that errata are acknowledged only if they are printed in a citable form; that is, an erratum notice must appear on a numbered page in the journal that originally published the article. Error notices that are inserted unbound into a journal issue or tipped in are not considered part of the permanent bibliographic record.

- To indicate that an article being cited had a subsequent erratum notice published, begin by citing the article. Enter the phrase "Erratum in: " followed by the journal title abbreviation, date of publication, volume, issue, and location (pagination). Use the same punctuation and format as you would for the article itself.

Blake DA, Proctor M, Johnson NP. The merits of blastocyst versus cleavage stage embryo transfer: a Cochrane review. *Hum Reprod.* 2004 Apr;19(4):795-807. Erratum in: *Hum Reprod.* 2004 Sep;19(9):2174.

*Separate multiple notice statements with a semicolon and a space:*

- To indicate that the article being cited contains an erratum notice, begin by citing the article. Enter the phrase "Erratum for: " followed by the journal title abbreviation, date of publication, volume, issue, and location (pagination). Use the same punctuation and format as you would for the article itself.

- See also the NLM Fact Sheet on Errata, Retraction, Duplicate Publication, Comment, Update and Patient Summary Policy for MEDLINE®

**Box 59****Retractions**

NLM uses two ways to show retractions in a citation:

1. a note that the article being cited has been retracted by the author(s) or publisher
  2. a note that the article being cited contains a notice of retraction by the author(s) or publisher
- To indicate that an article had a subsequent retraction notice published, begin by citing the article. Enter the phrase "Retraction in: " followed by the names of the authors, the journal title abbreviation, date of publication, volume, issue, and location (pagination). Use the same punctuation and format as you would for the article itself.

- To indicate that an article contains a notice of retraction, begin by citing the article. Enter the phrase "Retraction of: " followed by the names of the authors, the journal title abbreviation, date of publication, volume, issue, and location (pagination). **Box 60****Electronic publication before print**

- To indicate that a journal article was available over the Internet before it was available in print, follow the location (pagination) for the article with the word "Epub" and the date of Internet publication in the format year month day. Provide months in English and abbreviate them to the first three letters, such as Jan for January.

## B. Sample Citation and Introduction to Citing Parts of Journal Articles

The general format for a reference to a part of a journal article, including punctuation:

### Examples of Citations to Parts of Journal Articles

Rather than citing an entire journal article, a part of an article such as a table may be cited. In general, most modern articles have standardized to three types of parts: figures, tables, and appendixes. However, other names may be found for parts, including section, chart, graph, box, and photograph. Use the name provided in the article.

Because a reference should start with the individual or organization responsible for the journal article start with the article information, then follow it with the information about the part.

Journal articles frequently contain charts, figures, and other illustrative material that has been reproduced with permission from other sources. Do not cite these as parts using the instructions presented here. Consult the original publication and cite the particular item from there.

Note that PubMed cites only entire articles; you will not see a citation to a part in MEDLINE/PubMed.

## Citation Rules with Examples for Parts of Journal Articles

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

#### **Box 69**

##### **Roman numerals used as page numbers**

Table 8, Classification of lung adenocarcinoma; p. xv.

**Box 70****No page numbers appear on the pages of the part**

Occasionally, a table, figure, appendix, or other part will appear on a page that is not numbered.

- If only the particular part to be cited has no page numbers, identify the location in relation to numbered pages. For example: preceding p. 17 or following p. 503. Surround such phrases with square brackets.

Figure 5, Modelling the risk of in-hospital death following lung resection; [preceding p. 55].

Appendix, Patient questionnaire; [following p. 17].

- If the entire article has no page numbers or the part cannot be easily located in relation to numbered pages, give the total number of pages of the part you wish to cite, placed in square brackets, such as [5 p.].

Table, Checklist of symptoms; [1 p.].

## C. Sample Citation and Introduction to Citing Entire Journal Titles

The general format for a reference to an entire journal title, including punctuation:

- for a title continuing to be published:

- for a title that ceased publication:

Examples of Citations to Entire Journal Titles

If a journal is still being published, as shown in the first example, follow volume and date information with a hyphen and three spaces. If a journal has ceased publication, as in example two, separate beginning and ending volume and date information with a hyphen surrounded by a space.

Journals frequently change titles and publishers over time. When citing a journal, always provide information on the latest title and publisher unless you are citing an earlier version. If you wish to cite all volumes for a journal that has changed title, provide a separate citation for each title. For example:

JAMA: the journal of the American Medical Association. Chicago: American Medical Association. Vol. 173, No. 9, 1960 - . Continues: Journal of the American Medical Association.

Journal of the American Medical Association. Chicago: American Medical Association. Vol. 1, No. 8, 1883 - Vol. 173, No. 8, 1960. Continued by: JAMA.

It is not correct to cite it as:

JAMA: the journal of the American Medical Association. Chicago: American Medical Association. Vol. 1, 1883 - .

It is also important to cite the version you saw. Many journal titles with both print and Internet versions do not carry the same exact content. If you viewed a journal title on the Internet, do not cite it as if it were a print one. See Chapter 23B for citing Internet journal titles.

Authoritative information on a journal, in order of preference, may be found on: (1) the title page, (2) cover, and (3) the masthead of journal issues. Running headers or footers may not carry the official title of a journal.

Note that the rules for creating references to journal titles are not the same as the rules for cataloging them. Therefore records found in the NLM LocatorPlus and the NLM Catalog databases will not always agree with the instructions presented here.
