### A. Sample Citation and Introduction to Citing Entire Books and Other Individual Titles on the Internet

The general format for a reference to an entire Internet book, including punctuation:

### Examples of Citations to Entire Books and Other Individual Titles on the Internet

A monograph, commonly called a book, is any work complete in one volume or in a finite number of volumes. Online books are often electronic versions of large printed texts, such as textbooks, manuals, or technical reports, but may also be smaller works such as a brochure, single-page fact sheet, or brief treatise. Size is not relevant to the definition.

Increasingly books are written directly for the Internet to enable hyperlinking, to include complex graphics, and to run multimedia such as film clips and sound. An Internet book may be static, that is fixed in time and unchanged since publication, or may be updated or otherwise revised over time. Some producers of Internet books permit or otherwise welcome comments or expert opinion from readers and incorporate these comments into the text. Major revisions may be announced as new editions, but more minor additions and changes such as those to add comments, to correct typographical errors, or to update hypertext links may not be noted.

Although Internet books differ radically in physical form from the usual print book, the basic rules for citing them do not differ markedly from what is required for print. There is still an author or organization with responsibility for the item, a title, a place of "publication", a publisher, a date of publication, and the extent of the item (i.e., number of pages or the equivalent). Anyone citing an Internet document should try to locate all of these elements. Simply adding a Uniform Resource Locator (URL), DOI, or other electronic address to a title is not sufficient. Internet sites disappear with great frequency, and users of a citation must be given some other identifying information if they are to locate books on them.

Some elements, however, are more difficult to locate when citing Internet books. For example, some poorly constructed sites do not contain dates, and authorship or publishing responsibility may be unclear or absent. It also may be difficult to discern the title from the collage of graphics presented. The person doing the citing can only work with the information provided.

Do not confuse the publisher with the organization that maintains the Web site for the publisher. If wording such as "this site is maintained by XYZ Corporation for ABC Organization" appears, ABC Organization is considered the publisher and XYZ Corporation the distributor. Publisher information is required in a citation; distributor information may be included as a note if desired.

Some elements require expansion for an Internet citation to provide useful information to the user. For example, the date of publication is required in any citation, but many Internet items are updated or otherwise modified several times after the date of publication. The latest date of update/revision should therefore be included along with the date cited, i.e., the date the person doing the citing saw the item on the Internet. This is necessary in the volatile Internet environment, where changes can be easily made and an item seen one day may not be the same in crucial ways when viewed the next day. Producing a print or other copy for future reference is strongly recommended.

An Internet book is cited the same way that a print book is cited, with these exceptions:

- Use the word "Internet" in square brackets as the Type of Medium after the title.
- Include any date of update/revision and a date of citation in square brackets following the date of publication. Use the dates for the individual book being cited, not the dates of the Internet site as a whole unless no dates can be found for the individual item.
- When the extent (pagination) of the book is not provided, as often occurs, calculate it using the best means possible, e.g., in terms of print pages, screens, paragraphs, or bytes. If a book is not linear, and has many hyperlinks, it will be impossible to determine the length.

- Provide the URL or other electronic address of the item.

It is important to cite the version you saw. If you viewed a book on the Internet, do not cite it as if it were a print one. However, it may be useful to begin a citation to a book found on the Internet by first locating all of the information needed to cite it as if it were a print document, then add the Internet-specific items. For example:

*Print information*

Lefebvre P. Molecular and genetic maps of the nuclear genome. Durham (NC): Duke University, Department of Biology; 2002.

*Added Internet information (in bold)*

Lefebvre P. Molecular and genetic maps of the nuclear genome [**Internet**]. Durham (NC): Duke University, Department of Biology; 2002 [**modified 2002 Dec 11; cited 2003 Sep 5**]. Available from: [http://www.biology.duke.edu/chlamy\\_genome/nuclear\\_maps.html](http://www.biology.duke.edu/chlamy_genome/nuclear_maps.html)

If a book on the Internet does not have a formal title page, look to the opening screens, the bottom or closing screens, links from the sidebar, and the source code (viewable through the Web browser) to locate citation information.

While all monographs have certain elements in common for citation purposes, such as author, title, publisher information, and date, specific types of monographs have additional elements. For example, a citation to a technical report should include report and contract numbers. Examples of citation to reports and other types of monographs are included in this chapter, but see also the specific chapters about these types for more detail. Refer also to Chapter 2 Books for more examples of book citations.

## Citation Rules with Examples for Entire Books and Other Individual Titles on the Internet

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

### Author/Editor for Entire Books on the Internet (required)

#### *General Rules for Author/Editor*

- List names in the order they appear on the title page or opening screens
- Enter surname (family or last name) first for each author/editor
- Capitalize surnames and enter spaces within surnames as they appear on the assumption that the author approved the form used. For example: Van Der Horn *or* van der Horn; De Wolf *or* de Wolf *or* DeWolf.

- Convert given (first) names and middle names to initials for a maximum of two initials following each surname
- Give all authors/editors, regardless of the number
- Separate author/editor names from each other by a comma and a space
- If there are no authors, only editors, follow the last named editor with a comma and the word editor or editors; see [Editor and Other Secondary Authors](#) below if there are authors and editors
- End author/editor information with a period

#### *Specific Rules for Author/Editor*

- Determining the author if there is no standard title page
- Surnames with hyphens and other punctuation in them
- Other surname rules
- Given names containing punctuation, a prefix, a preposition, or particle
- Degrees, titles, and honors before or after a personal name
- Designations of rank in a family, such as Jr and III
- Names in non-roman alphabets (Cyrillic, Greek, Arabic, Hebrew) or character-based languages (Chinese, Japanese, Korean)
- Non-English words for editors
- Organizations as author
- No author can be found
- Options for author names

#### **Box 1**

##### **Determining the author if there is no standard title page**

Some books on the Internet do not display a traditional title page that clearly states the names of the authors. When there is no title page:

- Look at the top, bottom, or sidebar of the first screen or the bottom of the last screen of the book
- Do not assume that an individual named as Web master or contact person is the author; he or she most probably is not, especially for sites produced by large organizations
- Some sites give a name in association with a copyright statement, such as "copyright 1997 by John A. Smith". Do not assume that this individual is the author, either.
- If the only personal name given in a site is associated with a copyright statement, use that individual's name as the publisher
- Many sites will display an organization's name rather than a person's name. In such cases when the organization appears to be serving as both author and publisher, place the organization in the publisher position.

#### **Box 2**

##### **Surnames with hyphens and other punctuation in them**

- Keep hyphens in surnames

Estelle Palmer-Canton *becomes* Palmer-Canton E

Ahmed El-Assmy *becomes* El-Assmy A

Gerard de Pourville *becomes* de Pourville G

- Keep compound surnames even if no hyphen appears

Jaime Mier y Teran *becomes* Mier y Teran J

Virginie Halley des Fontaines *becomes* Halley des Fontaines V

[If you cannot determine from the title page or opening or closing screens whether a surname is compound or a combination of a middle name and a surname, look at the table of contents, the copyright page, or elsewhere in the text for clarification. For example, Elizabeth Scott Parker may be interpreted to be Parker ES or Scott Parker E.]

- Ignore diacritics, accents, and special characters in names. This rule ignores some conventions used in non-English languages to simplify rules for English-language publications.

See Appendix C for more abbreviations of commonly used English words.

- Be consistent. If you abbreviate a word in one reference in a list of references, abbreviate the same word in all references.

- Follow all abbreviated words with a period

**Box 42****Non-English names for publishers**

- Give publisher names in the roman alphabet (French, Spanish, Italian, etc.) in their original language
  - Rome: Societa Editrice Universo;
  - Lisbon: Imprensa Medica;
- Romanize names given in Cyrillic, Greek, Arabic, Hebrew
  - Sofia (Bulgaria): Sofia Medizina i Fizkultura;
- Romanize names or translate names in character-based languages (Chinese, Japanese, Korean). Place all translated publisher names in square brackets unless the translation is given in the publication.
  - Tokyo: Medikaru Rebyusha;
  - Beijing (China): [Chinese Academy of Social Sciences, Population Research Institute];
  - Taiyuan (China): Shanxi ke xue ji she chu ban she;
  - [Note that the concept of capitalization does not exist in Chinese. Therefore in transliterating Chinese publisher names only the first word and proper nouns are capitalized]
- If the name of a division or another part of an organization is included in the publisher information, give the names in hierarchical order from highest to lowest
  - Valencia (Spain): Universidad de Valencia, Instituto de Historia de la Ciencia y Documentacion Lopez Pinero;
- Ignore diacritics, accents, and special characters in names. This rule ignores some conventions used in non-English languages to simplify rules for English-language publications.
  - Treat letters marked with diacritics or accents as if they are not marked
    - Å *treated as* A
    - Ø *treated as* O
    - Ç *treated as* C
    - Ł *treated as* L
    - à *treated as* a
    - ê *treated as* e
    - ñ *treated as* n
    - ü *treated as* u
  - Treat two or more letters printed as a unit (ligated letters) as if they are two letters
    - æ *treated as* ae
    - œ *treated as* oe
- Follow a non-English name with a translation, if desired. Place all translated publisher names in square brackets.

Aarhus (Denmark): Aarhus-Universitetsforlag [Aarhus University Press];

- As an option, you may translate all publisher names not in English. Place all translated publisher names in square brackets unless the translation is given in the publication.

##### Government agencies and other national and international bodies as publisher

- When citing publishers that are national bodies such as government agencies, if a nationality is not part of the name, place the country in parentheses after the name, using the two-letter ISO country code (see Appendix D)

National Cancer Institute (US)

National Society on Alcoholism and Drug Dependence (NZ)

Royal Society of Medicine Press Ltd. (GB)

Royal College of Physicians (AU), Paediatrics & Child Health Division

- Do not confuse the publisher with the distributor of documents for the publisher. The most common distributors of US government agency publications are the US Government Printing Office (GPO) and the National Technical Information Service (NTIS). Designate the agency that issued the publication as the publisher and provide the URL of the distributor, preceded by "Available from:" and a space.

##### Joint publication

Two organizations may co-publish a book.

- Use the first organization appearing as publisher on the title page or the opening screens
- Place the name of the second organization as a note at the end of the citation, if desired

*Example:*

American Academy of Pain Medicine; American Pain Society. The use of opioids for the treatment of chronic pain: a consensus statement [Internet]. Glenview (IL): American Academy of Pain Medicine; c1997 [cited 2006 Nov 1]. 4 p. Available from: <http://www.painmed.org/productpub/statements/pdfs/opioids.pdf> Jointly published by the American Pain Society.

- Do not give more than one name as publisher

**Box 45****Multiple publishers**

- If more than one publisher is found in a document, use the first one given or the one set in the largest type or bold type
- An alternative is to use the publisher likely to be most familiar to the audience of the reference list. For example, use an American publisher for a US audience and a London publisher for a British one.
- Do not list multiple publishers. For those publications with joint or co-publishers, use the name given first as the publisher and include the name of the second as a note if desired. For example, use "Jointly published by the Canadian Pharmacists Association".
- End publisher information with a semicolon

*Example:*

American Academy of Pain Medicine; American Pain Society. The use of opioids for the treatment of chronic pain: a consensus statement [Internet]. Glenview (IL): American Academy of Pain Medicine; c1997 [cited 2006 Nov 1]. 4 p. **Date of Publication for Entire Books on the Internet (required)***General Rules for Date of Publication*

- Always give the year
- Convert roman numerals to arabic numbers. For example: MM to 2000.
- Include the month, if desired, after the year, such as 2004 May
- Use English names for months and abbreviate them using the first three letters, such as Jan

- Multiple years of publication
- Non-English names for months
- Seasons instead of months

- Date of publication and date of copyright
- No date of publication, but a date of copyright
- No date of publication or copyright can be found
- Options for date of publication

**Box 47****Locating the date of publication if there is no standard title page**

Some books on the Internet do not display a traditional title page that clearly states the date of publication. When there is no title page:

- Look for the date at the top, bottom, or sidebar of the first screen or the bottom of the last screen of the book
- Look for the date accompanying a copyright statement. For example: copyright 2006 by the American Chemical Society, © 2006 American Medical Association, c2006 Medical College of Wisconsin
- Look in the source code for the book if it can be displayed by the Web browser
- If neither a date of publication nor a date of copyright can be found, but a date can be estimated because of material in the book or elsewhere in the site, insert a question mark after the estimated date and place date information in square brackets

**Box 48****Multiple years of publication**

- For multiple years of publication, separate the first and last year of publication by a hyphen. Do not shorten the second of the two years to the last two digits.

2002-2003

1997-1998

1999-2000

- If months are given, place them after the year. Use English names for months and abbreviate them using the first three letters.

1999 Oct-2000 Mar

2002 Dec-2003 Jan

- Separate multiple months of publication by a hyphen  
2005 Jan-Feb  
1999 Dec-2000 Jan
- Separate multiple seasons by a hyphen; for example, Fall-Winter. Do not abbreviate names of seasons.

**Box 49****Non-English names for months**

- Translate names of months into English
- Abbreviate them using the first three letters
- Capitalize them

*Examples:*

mayo = May  
luty = Feb  
brezen = Mar

**Box 50****Seasons instead of months**

- Translate names of seasons into English
- Capitalize them
- Do not abbreviate them

*For example:*

balvan = Summer  
outomno = Fall  
hiver = Winter  
pomlad = Spring

**Box 51****Date of publication and date of copyright**

Some publications have both a date of publication and a date of copyright. A copyright date is identified by the symbol ©, the letter "c", or the word copyright preceding the date.

- Use only the date of publication unless three or more years separate the two dates
- In this situation, use both dates, beginning with the year of publication
- Precede the date of copyright by the letter "c"
- Separate the dates by a comma and a space. For example, "2002, c1997".

This convention alerts a user that the information in the publication is older than the date of publication implies.

**Box 52****No date of publication, but a date of copyright**

- A copyright date is identified by the symbol ©, the letter "c", or the word copyright preceding the date. If no date of publication can be found, but the publication contains a date of copyright, use the date of copyright preceded by the letter "c"; for example c2005.

**Box 54****Options for date of publication**

It is not NLM policy, but the following is an acceptable option:

The date of publication may follow the author names (or title if there is no author) in the list of references when the name-year system of in-text references is used.

- Use only the year of publication
- Use (1) the date of copyright, (2) the date of update/revision, or (3) the date of citation, in that order, if there is no publication date
- Place the date followed by a period after the last named author (or title if there is no author)
- Keep the date of update/revision and/or date of citation in their usual position unless they are the only dates available to follow the author(s) (or title)
- End the publisher name with a period if it is not followed by a date of update/revision or date of citation

### **Notes for Entire Books on the Internet (optional)**

#### *General Rules for Notes*

- Notes is a collective term for any type of useful information given after the citation itself
- Complete sentences are not required
- Be brief

#### *Specific Rules for Notes*

- DOIs
- System requirements
- Other types of material to include in notes

#### **Box 69**

##### **DOIs**

The DOI or Digital Object Identifier was developed by the International DOI Foundation to provide for persistent identification of documents across networks. It does this using a naming convention consisting of a prefix that contains the name of the particular DOI directory and the content owner's identifier, and a suffix that is a numeric or alphanumeric string supplied by the publisher.

Publishers register with the International DOI Foundation to obtain their owner's identifier, then submit their suffix to a DOI registration agency along with the URL and appropriate metadata for the particular document being registered.

Publishers are currently assigning DOIs at both the book and chapter level. Some assign one DOI to a book regardless of changes in edition or format, while others give a unique DOI to each version.

To find a book on the Internet using its DOI, add the prefix <http://dx.doi.org/> to the number.

To use a DOI in a citation:

- Begin with DOI followed by a colon and a space
- Enter the number supplied by the publisher

*Example:*

Schiraldi GR. Post-traumatic stress disorder sourcebook: a guide to healing, recovery, and growth [Internet]. New York: McGraw-Hill; 2000 [cited 2006 Nov 6]. 446 p. Available from: <http://books.mcgraw-hill.com/getbook.php?isbn=0071393722&template=#toc> DOI: 10.1036/0737302658

**Box 70****System requirements**

System requirements describe the particular software and hardware needed to view the book.

- Begin with the phrase "System Requirements" followed by a colon and a space
- Use the wording supplied by the publisher; no standardization is needed
- Separate the types of information by a semicolon and a space
- End requirement information with a period

*Examples:*

Continue to [Examples of Citations to Parts of Books on the Internet](#).

## Citation Rules with Examples for Parts of Books on the Internet

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

Entire Book (R) | Name and Number/Letter (R) | Title (R) | Date of Update/Revision (R) | Date of Citation (R) | Location (Pagination) (R) | Availability (R) | Language (R)

### Entire Book on the Internet (required)

- Cite the book according to [Chapter 22A Entire Books on the Internet](#) but omit the Date of Citation, Extent (Pagination), and Availability (URL)

### Name and Number/Letter for a Part of a Book on the Internet (required)

#### *General Rules for Name and Number/Letter*

- Enter the name of the part as it appears in the book
- Capitalize the name, such as Chapter, Table, Figure, or Appendix
- Do not abbreviate names. For example, convert Fig. to Figure.
- Follow the name with any accompanying number or letter, such as Chapter 12, Table 2, Figure 3.1, or Appendix A

- Romanize or translate titles in character-based languages (Chinese, Japanese, Korean). Place translated titles in square brackets.
  - *Ichiran-hiyo 3, or [Table 3, ]*

  - Treat letters marked with a diacritic or accent as if they are not marked
    - Å *treated as* A
    - Ø *treated as* O
    - Ç *treated as* C
    - Ł *treated as* L
    - à *treated as* a
    - ê *treated as* e
    - ñ *treated as* n
    - ü *treated as* u
  - Treat two or more letters printed as a unit (ligated letters) as if they are two letters
    - æ *treated as* ae
    - œ *treated as* oe
- Convert words and roman numerals used for part numbers into arabic numbers, so that the word for two or II becomes 2
- Provide an English translation, if possible, after the original language title; place translated titles in square brackets
  - Anexo, Creacion de las especialidades medicas [Appendix, Beginnings of medical specialties];
- To help identify parts in other languages, see the following examples:

<i>Editors of Book</i>	<i>Authors of Contribution</i>	<i>Date of Publication</i>	<i>Title of Contribution</i>	<i>Title of Book</i>	<i>Type of Medium</i>	<i>Connective Phrase</i>
Moore A, Moore J, Fowler S.	Faculty development for the Net Generation.	In:	Oblinger DG, Oblinger JL, editors.	Educating the net generation [Internet]. #### Examples of Citations to Contributions to Books on the Internet

Contributions are found when a book has an overall editor or editors and the individual chapters or other components of the book are written by various authors, usually called contributors. One or more of the editors may also be contributing authors. See also Chapter 2D Contributions to Books for additional examples of contributors to books in print or in microform (microfilm, microfiche).

Because a reference should start with the individual or organization responsible for the intellectual content of the publication, begin a reference to a contribution with the author and title of the contribution, followed by the word "In:" and information about the entire book.

The primary difference between citing a contribution to a print book and one on the Internet is in expressing the location (pagination) of the contribution. Unless an Internet book is in PDF (Portable Document Format), standard page numbers are usually not available. For non-PDF books:

- Give location as the total extent of the contribution.
- Calculate extent by the best means possible, in terms of the number of print pages, screens, paragraphs, or bytes, and place the total in square brackets. Screen size, font used, and printers vary greatly, but the purpose is to give an indication of the length of the part.
- Use the word "about" before the length indicator when the number is calculated.

Medical texts frequently contain charts, figures, and other illustrative material reproduced with permission from other sources. Do not cite these as contributions using the instructions presented here. Consult the original publication and cite the chart or other item from there.

Contributions to a part of a book on the Internet, such as a table or figure, may be cited as individual items. See [Chapter 22B Parts of Books on the Internet](#) and [Example 24](#) for instructions.

## Citation Rules with Examples for Contributions to Books on the Internet

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

[Author \(R\)](#) | [Author Affiliation \(O\)](#) | [Title \(R\)](#) | [Connective Phrase \(R\)](#) | [Book Information \(R\)](#) | [Date of Citation \(R\)](#) | [Location \(Pagination\) \(R\)](#) | [Availability \(R\)](#) | [Language \(R\)](#) | [Notes \(O\)](#)

### Author of a Contribution to a Book on the Internet (required)

#### *General Rules for Author*

- List names in the order they appear in the text
- Enter surname (family or last name) first for each author
- Capitalize names and enter spaces within surnames as they appear in the document cited on the assumption that the author approved the form used. For example: Van Der Horn *or* van der Horn; De Wolf *or* de Wolf *or* DeWolf.
- Convert given (first) names and middle names to initials, for a maximum of two initials following each surname
- Give all authors, regardless of the number
- Separate author names from each other by a comma and a space
- End author information with a period

#### *Specific Rules for Author*

- Surnames with hyphens and other punctuation in them
- Other surname rules
- Given names containing punctuation, a prefix, a preposition, or particle
- Degrees, titles, and honors before or after a personal name
- Designations of rank in a family, such as Jr and III
- Names in non-roman alphabets (Cyrillic, Greek, Arabic, Hebrew) or character-based languages (Chinese, Japanese, Korean)

Virginie Halley des Fontaines *becomes* Halley des Fontaines V  
[If you cannot determine from the title page or opening or closing screens whether a surname is compound or is a combination of a middle name and a surname, look at the back of the title page (the copyright page) or elsewhere in the text for clarification. For example, Elizabeth Scott Parker may be interpreted to be Parker ES or Scott Parker E.]
- Ignore diacritics, accents, and special characters in names. This rule ignores some conventions used in non-English languages to simplify rules for English-language publications.

- If both individuals and an organization or organizations appear on the title page or opening or closing screens of a contribution to a book as authors, use the names of the individuals as the author. Give the organization at the end of the reference as a note, if desired.

- For names of organizations in languages other than English:

- Give names in languages using the roman alphabet (primarily European languages, such as French, Italian, Spanish, German, Swedish, etc.) as they appear in the publication. Whenever possible follow a non-English name with a translation. Place all translations in square brackets.

- Complete sentences are not required
- Be brief

*Specific Rules for Notes*

- DOIs
- System requirements
- Other types of material to include in notes

**Box 119****DOIs**

The DOI or Digital Object Identifier was developed by the International DOI Foundation to provide for persistent identification of documents across networks. It uses a naming convention consisting of a prefix, containing the name of the particular DOI directory and

the content owner's identifier, and a suffix, a numeric or alphanumeric string supplied by the publisher.

Publishers register with the International DOI Foundation to obtain their owner's identifier, then submit their suffix to a DOI registration agency along with the URL and appropriate metadata for the particular document being registered.

Publishers currently assign DOIs at both the book and chapter level. Some assign one DOI to a book regardless of changes in edition or format, while others give a unique DOI to each version.

To find a book on the Internet from its DOI, add the prefix <http://dx.doi.org/> to the number.

To use a DOI in a citation:

- Begin with DOI followed by a colon and a space
- Enter the number supplied by the publisher

*Example:*
